

Your boat's gelcoat finish

The unique coating that makes up your boat's beautiful exterior is the result of many years of gelcoat research, testing and development.

The gelcoat is actually a thin surface coat of a specially pigmented polyester resin used in hand lay-up and spray-up fabrication to provide an attractive and weather-resistant surface to finished parts.

HanseYachts AG knows gelcoats. You can rest assured that your boat is protected with the industry's top-performing gelcoat – providing state-of-the-art protection against ultraviolet radiation and salt water while ensuring the flexibility and toughness required for the demands of boating.

Built to last

Gelcoats with LE technology have been formulated to meet the toughest requirements set by classification societies, like Lloyd's Register of Shipping, Det Norske Veritas, ANSI, etc.

Gelcoat care and maintenance tips

We hope that you follow these tips on gelcoat care and maintenance, which will help to preserve the beautiful appearance of your boat.

- Keep your boat cleaned and waxed.
- Wash your boat with only mild, non-abrasive detergents.
- Wax the exterior of your boat at least twice a year.
- Clean and wax your boat prior to placing it in storage.
- Use only a high-quality automotive wax in accordance with application instructions provided by the manufacturer.
- Remove any small scratches or scuffs using a fine rubbing compound. For any major repairs, consult your authorized dealer.
- Cover if possible to keep your boat looking its best. Store in a dry, covered area.
- Never use any abrasive cleaners or brushes on your boat's exterior surfaces.
- Remove any unintentional fuel or oil spills from the gelcoated surfaces as quickly as possible.
- Give your boat a fresh water wash after saltwater use.
- Never place a non-breathable cover on a boat that is still wet.
